Projects

Education

California State University Long Beach / *Bachelor's of Science*

August 2019 - May 2023, Long Beach

QuackQuackGo - *Developer*

- Contributed to a web application enabling users to plan trips and explore top destinations in specific regions
- Employed React, HTML, and diverse APIs to craft multi-page functionality, including streamlined search for popular tourist spots
- Applied CSS for seamless visual presentation across web pages
- Collaborated with team members on design iterations and comprehensive testing for the web application.

Image Classification Model (Python) - *Developer*

- Engineered a high-performance machine learning model for X-ray image classification.
- Attained accurate categorization, bolstering diagnostic precision.
- Conducted rigorous data preprocessing, feature extraction, and model optimization.

Infridgement - *Developer*

- Crafted a web application emulating a fridge management system using HTML for function implementation and CSS for visual refinement.
- Collaborated with team members on design iterations and comprehensive testing for the web application.

Experience

Office Assistant / *Saint Columban Vietnamese Catholic Education Program*

August 2015 - May 2023, Garden Grove

- Responsible for essential background work, technology troubleshooting, and paperwork organization. Efficiently ensured seamless operations by managing logistical aspects and optimizing information flow.

Treasurer / *Vietnamese Eucharistic Youth Ministry*

May 2023 - Ongoing, Garden Grove

- Responsible for transparent financial management, collaborative budgeting, streamlined processes, and fiscal stability to support community initiatives.
